I am man of 23 years; I am very passionate and working under pressure is one of my best qualities. I am holding Diploma in ICTL in Application Development, I like to work in integrated work or to work as a team, because I believe more than two mind can do better than one mind better, work progress more effectively, also so I can share my views with other people views but, I like to work as an individual to prove that I can do better on my own with minimal help of others.
